

IMET2000 PAL

International Medical Education Trust - Palestine

Issue 6, 1-Sep-2016

The overall mission of the Palestinian Health Sciences Education Centre is to provide high level professional education services to support and enhance the learning capacity of all involved in health science education and service delivery as a continuing lifelong learning experience. In doing so, it will undertake research and development to pioneer and exploit all modalities of the IT revolution including video-conferencing, telemedicine, website learning and internet connections and vehicles such as Moodle, aspiring to establish an international reputation as a center of excellence, eventually to have a major impact on patient care in Palestine.

IMET2000-Pal organizes the third training for doctors and nurses in CPR at Hebron Governmental Hospital

IMET2000-Pal in cooperation with the MoH Organized the third training session for doctors and nurses , who working in the Hebron Governmental Hospital (Alya) at Hebron in the presence of 25 doctors and nurses from all sections in the hospital.

IMET2000 organised and sponsored the first meeting of the working committee for continuing healthcare professional development framework. We have been asked by the MoH to actively participate in the development of a national strategic plan for continuing healthcare professional development.

This initiative aims to work with the Palestinian Accreditation and Quality Assurance Commission to oversee and review the accreditation of all Palestinian higher health sciences education programs. Working with the MoH and other NGOs, we hope to systematise CPD for health providers and as recommended by the National Human resource plan in Health in preparation for the implementing a system for a national continuing health sciences education.

IMET2000-Pal is pleased to announce that Dr. Ahmad Hmaidat and Dr. Mohammed ObeidAllah have joined our team as medical education officer and research officer respectively. Both are looking forward to working with you.

In collaboration with the Palestinian Ministry of Health and as part of our Infection Control Training Program, we organised a workshop on "How to prevent central line and ventilator related infections". The workshop attended by more than 25 doctors and nurses working in intensive care units in Palestine. IMET2000 will continue organising similar workshops to offer training for all those working on this field.
