IMET2000 Renews Support for Children with Special Needs from the Al Riyad Charitable Society

IMET2000 supports the Al Riyad Charitable Society in Salfit for the second consecutive year to cover the treatment expenses of another 10 Palestinian children for 2023 to help Al Riyad with their mission of looking after children with learning disabilities, mental disorders and autism. Al Riyad is a charity that provides rehabilitation services for children with disabilities from Salfit; mostly from poor families who cannot pay for their children's treatment. Their services include physical, occupational, and speech therapy, all essential for integrating this disadvantaged group of children into society. Our CEO stated that IMET2000 is very keen to support the efforts of Al Riyad to deliver its current objectives and become a sustainable service.

We hope to continue working with Al Riyad and other similar charities such as the Early Intervention Charitable Society to provide access to as many kids with physical and mental disabilities as we can regardless of their financial status.

IMET2000 Organised Advanced Cardiovascular Life Support Training Workshop at IMET2000-Pal Training Centre

IMET2000-Pal held a workshop covering advanced cardiopulmonary resuscitation attended by 6 doctors and nurses from different hospitals in cooperation with Arab American University (AAUP). It was titled:

Advanced Cardiac Life Support (ACLS) Course for Physicians and Nurses

The workshop aims to educate participants on various topics: recognise and manage respiratory and cardiac arrest and peri-arrest conditions such as symptomatic bradycardia, discuss and demonstrate airway management, stroke management, and related pharmacology. It also focuses on effective communication and leadership skills that are crucial within an ACLS team. The workshop was directed by a reliable instructor from the American Heart Association. The training involved the use of medical dolls which helped educate the trainees on how to perform advanced cardiac resuscitation on patients that needed immediate aid and allowed them to practice it. This was alongside an educational and practical explanation provided by the instructor. At the end of the second day, the trainees were assessed to measure their ability to deal with such cases.

IMET2000 Organised Three Basic Life Support Training Workshops this June

IMET2000 in cooperation with the Arab American University (AAUP) - Jenin, the Modern University College (MUC) - Ramallah and An-Najah National University (NNU) -Nablus organised Three training workshops attended by 27 doctors, nurses and interns from governmental and private hospitals on:

Critical Core Training: Basic Life Support (BLS) training for Healthcare Professionals

The workshops aimed to provide instructions and practical sessions about Cardiopulmonary Resuscitation (CPR) for healthcare professionals, Automated External Defibrillation (AED) and First Aid. They were led by certified instructors from American Heart Association(AHA).
