Snapshot of IMET2000-Pal's Activities in 2025: Proud of our Teams' Achievements

In 2025, IMET2000-Pal organised 59 workshops and training events, aligned with three main focus areas identified by community needs. The Life Saving Programme was the primary focus, addressing the need to equip healthcare professionals to manage critical health issues in Palestine. The Mental Health Programme was the second priority, aiming to strengthen resilience among healthcare professionals. Continuous Professional Development continued to grow, emphasising research, soft skills, and effective teaching for clinical educators.

Snapshot of IMET2000-Pal's Activities in 2025: Proud of our Teams' Achievements

In 2025, IMET2000-Pal trained 854 trainees, a 33.6% increase from 639 in 2024, reflecting expanded outreach across Palestine. Most participants joined the Life Saving Programme, while the Mental Health Programme also saw significant growth. More than 300 trainees completed CPD workshops in research, leadership, soft skills, and teaching and learning.

IMET2000 and Dura Al-Amal Charitable Association Sign a Memorandum of Understanding to Support Children with Learning Difficulties in Palestine

IMET2000 and Dura Al-Amal Charitable Association have signed a Memorandum of Understanding aimed at strengthening services for children with learning difficulties in the southern West Bank. Under this agreement, IMET2000 will support Dura Al-Amal Charitable Association through targeted interventions that improve child mental health and wellbeing, strengthen educational and therapeutic services, and build the professional capacities of staff in both career development and physical trauma and mental health care.

The signing took place at IMET2000-Pal in Ramallah and was attended by Dr Fadi Zaben and Dr Ahmad Rjoub on behalf of IMET2000, and Dr Mohammad Al-Sayed Ahmed, President, and Mrs Marcel Sweiti, Director, representing Dura Al-Amal, alongside representatives from both charities.

This collaboration represents a strategic step towards empowering local charities and improving access to integrated, high-quality services for children with learning difficulties, contributing to their overall development and long term well-being in Palestine.

As part of its ongoing partnership with Book Aid International, IMET2000 has donated a new collection of scientific books to the libraries of Palestine Polytechnic University – Hebron and Arab American University Palestine – Ramallah Campus.

The collection covers different fields such as medicine, nursing, dentistry, higher education, and scientific research. It aims to support students and faculty by providing easy access to up-to-date global knowledge.

Through this programme, IMET2000 continues to strengthen Palestinian university libraries with advanced academic resources, supporting students and educators to stay aligned with modern developments in health sciences and research.

Arab American University
Palestine

IMET2000 continues its commitment to advancing Palestinian nursing professionals by awarding a partial PhD scholarship to Mr Bilal Awad, enabling him to pursue a PhD in Palliative Care Nursing at Comillas Pontifical University in Spain.

Investing in advanced nursing education is a strategic step towards strengthening palliative care services in Palestine, where cancer patients require not only clinical treatment but also continuous psychological and emotional support throughout their care journey.

Mr Bilal Awad expressed his gratitude, stating:

"This scholarship represents a life-changing opportunity. It will allow me to focus on developing my PhD research in oncology and palliative care, to improve the health and well-being of cancer patients in Palestine."

IMET2000-Pal Conducts Two Advanced Cardiac Life Support (ACLS) Training Workshops for Healthcare Professionals

IMET2000-Pal hosted two Advanced Cardiac Life Support (ACLS) training workshops at the IMET2000-Pal Training Centre, targeting different healthcare professionals. Both workshops were delivered by certified instructors accredited by the American Heart Association (AHA).

The first workshop, titled **“Advanced Cardiovascular Life Support (ACLS) Course for Paramedics”**, was held on December 1–2, 2025, and was attended by six paramedics.

The second workshop, titled **“Advanced Cardiac Life Support (ACLS) Course for Physicians and Nurses”**, took place on December 29–30, 2025, with the participation of six doctors and nurses from various hospitals.

The second workshop, titled **“Advanced Cardiac Life Support (ACLS) Course for Physicians and Nurses”**, took place on December 29–30, 2025, with the participation of six doctors and nurses from various hospitals.

Both workshops covered the same core content, focusing on the management of respiratory and cardiac arrest, symptomatic bradycardia, airway and stroke management, and relevant pharmacological interventions. In addition, strong emphasis was placed on enhancing communication and leadership skills within an ACLS team.

IMET2000 Awards Partial Scholarships to Undergraduate Medical and Nursing Students in Palestine

IMET2000 has awarded the first batch of scholarships to medical and nursing students in Palestine, reaffirming its strong commitment to supporting students who are striving to continue their education under extremely challenging academic, financial, and conditions.

This first batch includes 12 partial scholarships awarded to students from Al-Quds University, Arab American University, and Hebron University.

The initiative aims to stand by students, support them financially, and help them complete their university education despite the challenges they face.

The students expressed their sincere thanks to IMET2000 for the scholarships and its continued support, saying that this assistance makes a real difference in their ability to continue their education.

IMET2000 confirmed that more scholarship rounds will be offered in the future to support a larger number of students and universities across Palestine.

Recognising the vital importance of immediate response in saving lives, IMET2000-Pal conducted two specialised training workshops titled:

"Critical Core Training: Basic Life Support (BLS) Training for Healthcare Professionals."

The sessions were held on **8 December** at MET2000-Pal Training Centre in Ramallah and on **22 December** at An-Najah Heart Centre, attended by **18 doctors and nurses**.

8 December 2025

The workshops aim to provide essential theoretical knowledge and practical skills in cardiopulmonary resuscitation (CPR) for adults, children, and infants, as well as training on the safe and effective use of Automated External Defibrillators (AEDs).

The trainings were delivered by certified instructors accredited by the American Heart Association (AHA), ensuring participants received up-to-date, standardised instruction in line with international guidelines.
